Designed for use on refrigeration, air conditioning, and electric heating systems.

- High performance as well as Reliability
- Universal mounting base allows replacement of most contactor brands
- Lugs and quick connects
- UL/CUL (lug terminal style)

HD General Purpose fan relays used on heating and air conditioning to provide switching of heavier loads with a compact size relay.

- 0.25 quick-connect terminals
- Easy replacement of competitive relays
- Replaces WR/Essex/RBM type 184
- UL/CSA

CROSS REFERENCE

ProParts three wire hard start kits feature North American made capacitor and relay which deliver the performance and reliability you have come to expect. Compressor start times are reduced by 30%. Hard Start kits help compressors start quicker to minimize compressor winding overloads that can contaminate refrigerants and cause premature failures.

Features:

- North American Start Capacitor and Relay
- Designed for 208-230/240 Volt applications
- 3 Wire design for maximum performance
- Reduces start time by 30%
- Extends life of compressor
- Kits include mounting hardware

FRNR fuses - Time-delay for motor start-ups and transformer inrush currents without nuisance opening.

- Replaces: TR, ECNR, FRNR, FLNR
- 250 VAC, Class RK5
- I.R. AC: 200 kA; I.R. DC: 20 kA
- ROHS Compliant
- UL/CSA

ATC fuses are easily replaced and can be used for a variety of low voltage electronic applications.

- Industry standard color-coding to indicate amp rating
- Automotive blade type - 32V DC
- ROHS Compliant
- UL/CSA

Goodman ProParts offers the most extensive line of hot surface igniters in the industry including direct replacement and universal kits.

The benefits include:

- Quickest time-to-temperature
- Improved resistance to breakage during assembly and transport
- Superior performance during low voltage conditions
- Enhanced resistance to micro-cracking
- CSA certified igniters
- Reliability tested to over 100,000 ignition cycles

The 900 Series Flame Sensors are used with Direct Spark Ignition (DSI) and Hot Surface Ignition (HIS) systems.

Features:

- Universal flame sensor or direct replacement sensors covering over 90% of residential furnaces
- 0.114 in. (2.9 mm) diameter flame rod of Kanthal D, Hoskins 815 or engineering approved equivalent for high temperature applications
- High-quality Alumina ceramic insulator
- Male spade terminal connection allows easy connection to existing wire harness without replacing the entire assembly. Some models come with detachable lead wires where indicated.
- Where provided, 250° C temperature rated lead wires with Teflon coated insulation
- Zinc plated or stainless steel mounting brackets to improve corrosion resistance
